SETUP REQUIRED:

- **Google Sheets** — connect Google OAuth
- **Gmail** — configure App Password (SMTP)
- **AI** — add API key in credentials
- **Sheet** columns needed: Full Name, Email Address

RATE LIMIT:

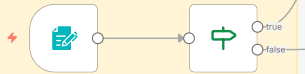
- Personalized: 5s delay between emails
- Bulk: single send, all emails comma-separated
- Safe daily limit: ~150 personalized / ~500 bulk

HOW TO USE:

1. Fill the Newsletter Request Form
2. Leave body empty → AI writes it
3. Fill body → skips AI, sends directly
4. Toggle personalization for name-based emails

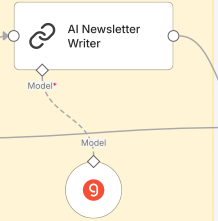
Newsletter Request Form

- Accepts: topic, subject, newsletter body (optional), personalization toggle, additional instructions
- If newsletter body is empty → generate with AI. Otherwise skip.



AI Newsletter Writer

- Uses Groq LLM to generate HTML newsletter based on topic and client instructions
- AI model powering the newsletter generation

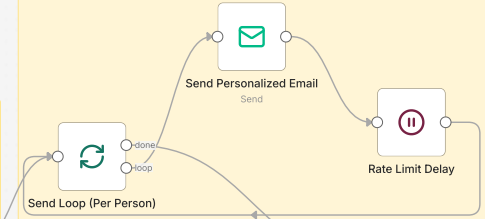


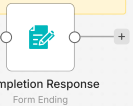
Fetch Subscribers

- Merges AI-generated or manual body into unified fields
- Reads customer name and email from Google Sheets CRM
- Yes → loop per person with name. No → bulk send via comma-separated emails

Send Personalized Email

- Sends individual HTML email with recipient's name injected



Send Bulk Email


- Sends one email to all subscribers at once
